1 Introduction

1.1 Problem

1.2 Solution Overview

1.3 Diagrams

1.4 High-Level Requirements

1. If a user tries to remove the bike from a stationary location without the electronic key (RFID tag), the alarm will sound.
2. The device receives GPS data and records its own position over time. The device also performs rudimentary processing to record its distance traveled and speed.
3. The device transmits its GPS location data and additional data over LoRa to be received by a base station.

2 Design

2.1 Top-Level Block Diagram

2.2 Subsystem Overview

2.2.1 Control Subsystem

2.3 Tolerance Analysis

3 Ethics and Safety
